

VM IV DUOFENCE PREMIUM

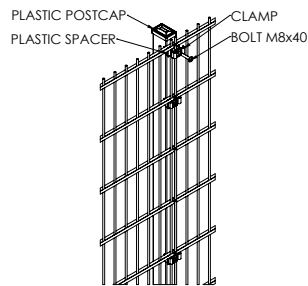

DUOFENCE PREMIUM VM IV

The DUOFENCE PREMIUM panel is the top of the range in the VM 2D welded mesh panel program. These panels excel both in stability and durability. The high quality is ensured by the use of top-quality materials and their careful processing. The mesh patterns of 50x200mm in combination with 2x8mm wires horizontal and 1x6mm wire vertical ensures a strong and very effective perimeter solution.

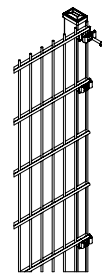

The fence system VM IV ensures a very easy assembly and exceptional security solution. The RHS posts of this system in combination with synthetic noise reducing clips, stainless steel cover plates and security bolts makes this system a more cost effective system than our system VM III.
